

Exponential Organizations Romania Meetup

 12th June 2019 | 5:30pm–7:30pm | V7 Startup Studio

ExO Romania Meetup

Exponential Organizations (ExOs) are a new breed of organizations that could disrupt entire industries by tapping into and managing abund. The concept was introduced in the bestselling book, [Exponential Organizations](#), co-authored by Salim Ismail, co-founder of Singularity University and Chairman of OpenExO and ExO Works.

The ExO Model is the base of the ExO Sprint methodology, and has grown exponentially through a strong community that formed around Salim's book. At this event, we'll highlight the Sprint as detailed in the book [Exponential Transformation](#) and share some case studies from recent clients.

This event is directed at those who struggle to transform from a traditional to an exponential operating model and are interested in moving away from a scarcity mindset towards one of abundance. More details on the ExO mindset are here in [this article](#) and in [Salim's TedX Talk](#).

Salim is not joining for this event, but this will be a great warm-up before Salim speaks about Exponential Organizations at [Icee.Fest: Upgrade 100](#) on the 14th of June!

GUESTS & EVENT DETAILS
